

# Campx

Empowering education by combining minds

# Aim

- The aim of this project is to develop a comprehensive website that will serve as a one stop learning service, offering a platform for students to engage in learning circles and join various clubs

# Objective

- To create an inclusive and dynamic online learning community that fosters continuous growth and promote active learning engagement.
- To provide and integrate access to a wide range of academic resource which can be shared and new resources updated .
- To create a user-friendly interface to join learning circles and even make new circles for students who seek to expand their knowledge in various subjects from collective learning efforts.
- To incorporate various clubs in the platform to cater diverse interests and learning needs like in-depth discussions on specific topics or subjects.

# Scope

- This website is built in such a way that it suits all the learning requirements of students both individual and their group study .
- On the launch of this website the student of our university will be brought to one platform where they can exchange seamless data and foster engagement and promote personalised learning for academic success.
- The project has the following modules :
  - \* Student details
  - \* Resource details
  - \* Learning circle details
- Club details

2 to 6

# Conclusion

- # The student's personal information is protected using stringent security measures to safeguard user confidentiality.
- # The students can retrieve study materials for individual study .
- # They can form micro peer groups to conduct online offline meetings
- # They can collaborate with the subject experts in the discipline where they need extra support.
- # Create a one stop learning service for the student community

# Future scope

- # We intended to ensure that the website is optimised for mobile device.
- # We will provide interactive learning tools such as virtual labs and discussion forum to facilitate active learning experience
- # We intend to incorporate analytics and reporting features that will allow the students to track their progress monitor their learning outcomes and provide suggestions to enhance learning effectiveness
